

## LeetCode - Clean digit

```

class Sol {
    String clean dig (String s)
    {
        int l = s.length();
        for (int i = 0; i < l; i++)
        {
            if (!isDigit(s.charAt(i)))
            {
                if (i == 0) (s, erase (i-1, 2));
                l--; i--;
            }
            else
            {
                s, erase (i, 2); l--; i--;
            }
        }
    }
}

```

Case 1

Input s = "abc "

Output "abc "

Expected "abc "

Case 2

s = "cb34 "

Output " "

Expected " "
